VOLUME 8; NO. 27

CARBON, ALBERTA, THURSDAY, AUGUST 7, 1930

\$2.00 A YEAR IN ADVANCE

## WHEAT CROP ABOUT READY FOR BINDER

The wheat fields in the Carbon district have made rapid strides in the past couple of weeks and many of our local farmers to the south have been cutting for the last six days. By the end of the week it is expected that most of the farmers will have commenced wheat cutting. This is still early for the harvest, although most of the seed was in the ground early this spring and with the warm dry weather the wheat has matured rapidly. Both binders and combines will be used in this district. Some of the fields can only be harvested with combines on account of the short straw.

Harvest in the West has begun. Though the reapers are not generally at work until August is well under way. Individual farmers in both Manitoba and Saskatchewan have started their wheat-cutting. Coarse grains are already being harvested throughout the West.

Record in the Cardross district of Southern Saskatchewan is believed to have been set by the early activity of William Suehwold, three miles north of Cardross. He cut 25 acres of Reward wheat, and his yield will be about 12 bushels to the acre.

First wheat cutting in Manitoba is reported from the farm of T. H. Cosgrove, in the southern Napinka area. Cosgrove is reaping quality wheat, standing about three feet high, well

## LIVESTOCK SAVES

Without the Safeguard of Livestock Crop, Any Grain Country May Face Danger

China is in the grip of a food famine. Why are two million Chinese doomed to die?

The Kimberley press answers this by saying that they starve because they have no livestock. They farm scientifically, with crop rotation, yet they have no great reserve of food such as is represented by the flocks of America. If a land depends on its plant crops entirely, one crop failure is likely to be famine. But a livestock industry represents a huge reservoir of foodstuffs on which a country may draw.

Before livestock became an essential of general farming, famine conditions were likely to arise anywhere, as they frequently did.

The parts of United States where no livestock is kept, are the sections where the farmers have the hardest time to get along. The introduction and encouragement of diversified farming have been a prime mission in the work of agricultural schools and departments.

More than half the annual value of the farm products of America lies in cattle, hogs, sheep, horses, poultry, and by-products of these.

filled and yielding approximately 15 bushels to the acre. In this section, where seeding was early, harvest may be fairly general by the end of the week.

## NO HARVEST HELP WILL BE NEEDED THIS YEAR

Alberta expects to be able to take care of its crop this year without importation of harvest workers from outside. It was announced last week by Hon. George Hoadley.

There will be no harvesters' excursions from the east, added Mr. Hoadley, and if the crop turns out better than expected and help is needed, the men will be brought in from British Columbia.

## TENNIS NOTES

### CARBON PLAYS GLEICHEN INTER TOWN MATCH AT TENNIS

The Carbon Lawn Tennis Club entertained the Gleichen Club on Wednesday July 30th. The full nine events for the club match, as called for in the Alberta Lawn Tennis Association rules, were played, and resulted in a win for Carbon by six events to three. This is the first meeting between these clubs, but so close did many of the games run that there will be a great deal of interest taken in the return match at Gleichen. The Carbon players seemed to rise to the occasion and display their best form, and with all doing so well it is difficult to select a feature match, although this was probably the first men's doubles, where Len Poxon and J. M. MacDonald, after being down one set and two games in the second, before the storm which delayed play, made a wonderful comeback to take the match by two sets to one.

The following are the results and scores.

**Men's Singles**—Yates of Gleichen defeated V. Hawkins of Carbon, 6-2, 7-7, darkness intervening.

**Mattson of Gleichen** defeated Wm. Edwards of Carbon 8-10, 6-0, 6-2.

**Ladies' Singles**—Mrs. Peters of Carbon defeated Dr. Windsor of Gleichen, 6-2, 6-0.

**Junior Men's Singles**—W. Poxon of Carbon defeated J. Brown of Gleichen 6-3, 6-4.

**Junior Ladies Singles**—Irene Nash of Carbon defeated Olive Milljour of Gleichen, 6-1, 6-4.

**Men's Doubles**—J. Poxon and J.M. MacDonald of Carbon defeated Yates and McCallum of Gleichen 5-7, 6-4, 6-4.

Swain and Mattson of Gleichen defeated C. H. Nash and H. Willson of Carbon 6-4, 6-3.

**Ladies' Doubles**—Mrs. Willson and Irene Nash of Carbon defeated Mrs. Sather and Miss Milljour of Gleichen, 6-1, 6-4.

**Mixed Doubles**—Mrs. Peters and Bruce Ramsay of Carbon, defeated Miss Severn and H. Marcellus of Gleichen, 6-1, 6-2.

### CARBON JRS. PLAY ACME JUNIORS TENNIS MATCH

Four Acme School Students made the trip to Carbon on July 31st to play a Lawn Tennis match with four of the Carbon boys. Four singles and two doubles were arranged, and of these Carbon won three and Acme two, with one, N. Nash, Carbon and S. Young, Acme unfinished with Nash leading three games to two. It was decided to finish this on Wednesday, August 6th, when the Acme Club play their return match with the Carbon Club. Acme still have a chance to tie in the match. The following are the results and scores:

**Singles**—W. Poxon, Carbon, defeated I. McCook, Acme, 6-0, 6-0.

C. Poxon, Carbon, defeated L. Rinn, Acme, 6-2, 6-3.

J. McGuinness, Acme, defeated J. James, Carbon, 2-6, 6-1, 7-5.

N. Nash, Carbon, leading 3-2 against S. Young, Acme.

**Doubles**—W. Poxon and C. Poxon defeated I. McCook and L. Rinn, Acme, 6-1, 6-3.

S. Young and J. McGuinness, Acme, defeated N. Nash and J. James, Carbon, 3-6, 6-4, 6-3.

## BANK OF MONTREAL ISSUES CROP REPORT OF PRAIRIES

**General**—Fairly general rains have benefited crops in the Prairie Provinces, especially in parts of Alberta where moisture was urgently needed, but excessive heat in Southern Saskatchewan and the earlier drouth in Southeastern Alberta have caused deterioration, and yields in those areas will be below average. In Quebec the weather on the whole has been fine and warm and crops generally are progressing favorably, warm dry weather is now essential. In Ontario the state of the crops on the whole is satisfactory, although some areas require rain immediately. In the Maritime Provinces good growing weather has been experienced and the crops generally show improvement. In British Columbia hot, dry weather throughout the Province is causing rapid growth. Details follow:

**Alberta—Northeastern area**—Wheat is 80 per cent headed out and, following rain, indications are for a fair crop. Some isolated hail losses are reported.

**Southeastern area**—The whole district has benefited by rain, but because of earlier drouth, the yield will only be fair.

**Western Area**—Following rain, the crops are making good progress and the moisture is now sufficient until harvest. Wheat is 75 per cent headed. Some hail damage is reported. The sugar beet crop is in a very satisfactory condition.

**Saskatchewan—Northern Area**. Crop conditions generally continue favourable, with sufficient moisture. Present indications are for good average yield.

**Southern Area**—Summerfallow and breaking crops are standing up fairly well, but the recent excessive dry heat has caused too rapid ripening of the stubble crops and white tips are reported, particularly in the southeast. Prospects are for a yield considerably below average.

**Manitoba**—Weather conditions continue favourable for the maturing crop. Wheat is all headed out and is now in process of filling. There are some indications of rust, but they are not extensive and no damage is reported so far. Losses from all causes are slight.

**FOR SALE**—Broilers, 3 to 5 pounds. 25c dressed. 18c live. H. Braden.

### NEW SPEED RECORD CREATED ON PACIFIC

Creating a new speed record for Pacific Coast vessels, S.S. Prince Henry, new flagship on the Canadian National fleet, steamed into harbor recently, having completed her maiden voyage to Skagway and return. Making an average speed of 20½ knots between Prince Rupert and Vancouver, she occupied exactly twenty-four hours for the trip. This beats the former speed record made in 1918 by S.S. Prince George, by some two hours. A full complement of tourists arrived with the "Prince Henry," including four brides and grooms who spent their honeymoon on board.

### THE UNEMPLOYED PROBLEM

A system of winter camps for unemployed will be initiated in Saskatchewan and British Columbia as a result of the recent tri-provincial parley at Edmonton. It was stated by Hon. J. A. Merkley, Minister of Labor, who represented Saskatchewan at the gathering. The success of the plan in Alberta is given as the season for the decision. About 1000 men will be cared for in Saskatchewan under the plan, it is expected. The camps will be placed in the bush from mid-November until early April. They will engage large gangs of men cutting roads through the bush lands, sawing cordwood, and so on.

"Was your husband in comfortable circumstances when he died?"

"Not by a jugful. He was crushed between a five-ton truck and a concrete wall."

### MOTOR AGE BEHIND GRAIN SURPLUSES

Machinery displacement of horses and mules has much to do with the existing surpluses of grains on this continent and the grossly over-produced condition of the agricultural industry, declares a recently issued publication of the Horse Association of America.

As a partial remedy of the situation the publication urges that horses and mules be used wherever and whenever they are found as cheap of operation as motor driven vehicles.

It is claimed that the destruction of the normal increase in horses and mules through the substitution of automobiles, trucks and tractors has cut down the acreage needed for animal power production and maintenance from 107,162,500 acres to 52,905,000 acres in America.

## When a Laxative Gripes --- BEWARE!

Severe abdominal pains, griping, after taking a laxative is an indication of unnatural strain that may cause serious injury.

No laxative that causes such discomfort is safe, or necessary. ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, night or morning, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

# ENO'S "FRUIT SALT"

## The World's Grain Exhibition

The World's Poultry Congress is now in progress at the Crystal Palace, London, England, including a representative display of birds from Canada and with prominent Canadians identified with the poultry industry in attendance. A year or two ago Canada was honored by being host to the World's Poultry Congress, held in Ottawa, and which proved to be the most successful of these world's congresses held up to that time. Canada received most valuable publicity as a result, while the poultry industry throughout the Dominion was decidedly benefited thereby.

Canada is again to be host to a world's exhibition and conference in 1932, when the World's Grain Exhibition and Conference will be held in the city of Regina, Saskatchewan. It will be the greatest grain exhibition and conference ever held, with over \$200,000 in cash prizes, an unprecedented sum, to be awarded, while grain experts from all over the world will be in attendance to participate in the conference.

Already the response of countries in every hemisphere has surpassed expectations. To date nearly one million copies of the official prize list have been distributed in 84 countries. They have been placed where they will do the most good, and give a maximum of advertising to Canada, and Western Canada in particular, in every corner of the civilized world.

Canada as a country dependent on agriculture, and suffering all the growing pains of the young, needs this advertising, and even supposing no person from outside Canada attended the Exhibition and Conference at Regina, in 1932, the world-wide advertising already secured would be an ample return for all monies expended to date.

But the countries of the world will be represented, not only by interesting and instructive exhibits, but by leading agricultural experts. The Government of Canada officially issued invitations to other countries to participate and today, two years before the event, eight countries have accepted. These are Peru, New Zealand, Guatemala, Poland, Czechoslovakia, Yugoslavia, Belgium and the Netherlands. The Governments of other countries, such as the United States, Great Britain, France, the Argentine, Australia, have asked for further and more complete information, and by 1932 it is expected at least 50 countries will have accepted the invitation and be present.

The management of the World's Grain Exhibition and Conference has taken advantage of the World's Poultry Congress, in London, England, this month to further its campaign for world-wide participation at Regina in 1932, and has sent an exhibit to London, and this week are entertaining, in London, the official delegates of 56 countries. At this luncheon the managing director of the World's Grain Exhibition will address these delegates and outline to them why they should participate at Regina. Afterwards he will visit the ministries of agriculture, of the countries of Europe, to drive that message home.

Exhibits of the World's Grain Exhibition are also being prepared for the Canadian National Exhibition, and the Royal Winter Fair, at Toronto, and the International Grain Show at Chicago.

This is what is being done to bring the world to Western Canada in 1932. But, and this is important, Western Canada should put forth every effort to retain for this country the world's championship wheat trophy. Other countries are going to try and capture it; we are asking, even urging them, to make the attempt. Western Canada must therefore look to its laurels. The wheat farmers of Western Canada, the best in the world, must be alert and put forth their best efforts, individually and collectively, to retain for this Dominion the proud title of the World's Wheat King.

Now is the time to prepare for the exhibition. It cannot be put off until 1932. It must be done in 1930 and 1931.

**The Oil Of the People.**—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

Illuminated cap badges are used by the messenger boys of a wireless telegraph company in London.

## Archbishop Opposed To Death Penalty

Says It Lowers Conception Of Sanctity Of Life

The Most Rev. William Temple, Archbishop of York, is one of the few witnesses who has come so far before the Royal Commission on punishments to favor the abolition of the death penalty.

"I dissent from the view that punishment should be regarded as regulated vengeance," the Archbishop stated. "From a Christian viewpoint, vengeance is entirely illegitimate. The infliction of death or outlawry would, perhaps, be justifiable in the case of a man who was wholly evil but no person was ever that."

The main argument advanced by the archbishop from a sociological viewpoint was that the behaviour of a community as a whole was so largely imitative that the reaction to the taking of life by the state tended to a lower general conception of the sanctity of human life.

## Summer Complaints Kill Little Ones

At the first sign of illness during the hot weather give the little one Baby's Own Tablets or in a few hours he may be beyond aid. These Tablets will prevent summer complaint if given occasionally to the well child, and will promptly relieve these troubles if they come on suddenly. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine as good and the mother has the guarantee that they are absolutely safe. They are sold by all druggists or by mail at 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

## Usual Order Reversed

Cleveland Children Look On While Parents Graduate

The usual order of school commencements was reversed at Cleveland when an audience of children sat in the auditorium of John Hay High School and applauded their parents as they marched to the platform to receive high school diplomas. The occasion was the annual commencement of the Cleveland Extension High School.

Ages of the graduates ranged from 17 to well past middle age. In the class was a golf professional, an assistant sales manager, a chief auditor, a credit manager, an assistant treasurer and a field manager for a large oil company.

**Persian Balm**—there is nothing like it for creating and preserving a lovely complexion. Cooling, caressing—it soothes and dispels all roughness or chafe caused by weather conditions. Delicately fragrant, it adds exquisite charm to the most finished appearance. Dainty women inevitably choose Persian Balm. A velvety smooth lotion, it makes the skin rose leaf in texture. Recommended also to soften and whiten the hands. Truly a peerless toilet requisite for every woman.

**Freshman:** "What would you do if the girl you were calling on yaved and shrieked that she never wanted to see you again?"

**His Buddy:** "I'd jump to my feet and leave."

**"And let her fall to the floor?"**

Toothache and neuralgia are instantly relieved with Douglas' Egyptian Liniment. A quick sure remedy. Also recommended for burns, sprains, sores and inflammation.

Wax figures for store windows in London are being made to represent Helen Wills, Princess Elizabeth, Prime Minister MacDonald and other well-known people.

An exceptional coconut tree may produce as many as 500 nuts in a year.

## Thinning Hair

Stimulate your scalp and prevent dandruff by massaging with Minard's. It gives hair new lustre.

"KING OF PAIN"  
LINIMENT**

## May Purchase Canadian Land

Another English Peer Interested In Farming In Dominion

The possibilities of southern Saskatchewan for ranching on a large scale were investigated recently by Lord Middleton, Yorkshire landowner, who is touring Canada with a view to purchasing land in this country. Lord Middleton specializes in breeding beef cattle on his 3,000-acre farm in the north of England. He recently made the decision to dispose of the whole of his estates, comprising some thousands of acres, driven to this step by the excessive burden of taxation to which every British landowner has been subjected since the war. It is his plan to take up land in Canada. He was an interested visitor at the Brandon Summer Fair, and in all the departments he visited, those in charge were rather amazed at the knowledge he had of farm affairs and of horticulture. He brought over to Ontario some fifty Yorkshire lads, who will be placed on Ontario farms.

## Father Of Many Inventions

Sir Charles Wheatstone Gave Many Scientific Ideas To World

The concertina celebrated its centenary last year. It was invented and Charles—Wheatstone, in 1829. He must have been a wonderful man, for his inventions seem to have been legion. Sir Charles invented, for example, the stereoscope, by which the appearance of solidity is obtained through the mental combination of two pictures, and the polar clock, which made it possible to tell the time by the light from the sky although the sun might be invisible. It was he who made the electric telegraph available for the public transmission of messages. And in between his scientific studies he sandwiched the invention of our little musical friend the concertina.

Complete in itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

## Nanking Is Ambitious

Has Extensive Plan To Reconstruct City In Big Way

Nanking, China, proposes to reconstruct the city in a big way. Already 77 proposals of improvements have been adopted. Among them are the construction of a river port, installation of a waterworks system, opening of a metropolitan park and a Grand Metropolitan Museum, provision for three clinics, promotion of industry and the opening of factories, development of afforestation, and laying out of a beautiful residential district.

## To Cope With Cancer

War-Time Mustard Gas Now Used For This Purpose

Use of war-time mustard gas in combating cancer is described in the annual report of the grand council of the British Empire cancer campaign.

The report said, "Mustard gas seems to be the first true anti-carcinogenic agent ever discovered." Action of the gases was explained as being localized to the particular area under treatment and its cure to be strictly limited in time. But none the less on that account a remarkable cure."

## Game In Canada

The physical characteristics of Canada—its innumerable lakes, extensive forests, and great open prairies—combine with its natural geographical situation to constitute a distinct faunal region within which is to be found almost every species of game native to the North American continent.

## HEADACHES

Needless pains like headaches are quickly relieved by Aspirin tablets as millions of people know. And no matter how suddenly a headache may come upon you, you can always be prepared. Carry the pocket tin of Aspirin tablets with you. Keep the larger size at home. Read the proven directions for pain, headaches, neuralgia, etc.

## Foods Stay Fresh Longer This Way

Covered with Para-Sani Heavy Waxed Paper goods that usually stale in a day or so stay fresh for quite a long time. Try it. Get Para-Sani in the handy, sanitary, knife-edged carton at grocer, druggist or stationer. For less exacting uses get "Centre Pull" Packs in sheet form.

Pimples ended so quick by "Sootha-Salva" you can actually see them dry up. Many go overnight. Get "Sootha-Salva" from druggist today. New skin beauty tomorrow morning.

## WORLD HAPPENINGS BRIEFLY TOLD

Sir Esme Howard, British ambassador to the United States, who was granted a barony on the recent King's birthday, has taken the title of Baron Howard of Penrith.

Professor Ludwig Stein, internationally known philosopher and author, died at a nursing home at Salzburg, Austria, after an operation. He was 70 years old.

Canadian shipping companies had the bulk of the wheat business on the Great Lakes last month, according to the report of the Lake Shippers' Clearance Association.

The British Government is highly pleased by the shipbuilding holiday agreed to by France and Italy, Premier J. Ramsay MacDonald told a questioner in the House of Commons.

The financial situation among Chicago's 13,000 public school teachers is once more acute. It is vacation time and pay cheques are three weeks overdue. To date, the back pay amounts to \$6,500,000.

Hundreds of thousands, celebrating 300 years of Massachusetts history, heard Sir Ronald Lindsay, British ambassador, bringing the greetings of the ancient mother state to the sovereign state of Massachusetts.

G. W. Jones, Canadian expert on taxation, has arrived at Canberra, Australia, at the invitation of the government of the commonwealth, to advise the administration regarding the operation of the sales tax introduced in the budget brought down recently.

British unemployment figures still are soaring upward a government report indicated. The Ministry of Labor announced that on July 7, the total out of work was 1,933,500, a gain of 42,925 over the previous week and 789,254 more than the same period last year.

### Bright Spots At Port Churchill

#### Northern Port Now Boasts Of Four Lady Residents

Up on the rocky shore of Hudson Bay, Churchill was once "No Woman's Land." For five years—including the winters—Mrs. A. Gibson, wife of the Church of England minister, has made the new port her home. But this summer Churchill boasts its largest contingent of femininity—four women.

Three new lady residents came north on the Muskeg Limited late in May. They were: Mrs. S. Martin, wife of the United Church missionary; her daughter, Margaret; and Mrs. Claude Johnson, wife of the divisional engineer of the Canadian National Railways. All three will reside at Churchill until autumn.

#### Alberta Beet Sugar Production

It is expected that about 24,000 tons of sugar will be produced from the sugar beet crop in Southern Alberta this year. Growing of sugar beets in the Raymond district, Alberta, is an important industry.

The United States produces more than 21,000,000 gold fish for commercial purposes in a year.

"Why haven't you written out your lines: 'I must sit still'?"  
"But I couldn't write them when I had to sit still, sir."—Moustique, Charleroi.

W. N. U. 1847

## Will Increase Safety In Steel Construction

### Electrical Finger "Feels" Strain In Steel When Under Great Pressure

An electrical finger that "feels" the invisible twists and strains in steel under great pressure was described to the American Society of Testing Materials.

The purpose is to increase safety in construction by making under conditions of actual use tests heretofore confined to research laboratories. The device was described by J. P. Shamberger, of Pittsburgh, who said it was designed by J. G. Ritter, of the Westinghouse Electric & Manufacturing Company.

No longer than a human finger, and not much thicker, it bolts to the side of a rail and records the bending as a 100-ton locomotive thunders over. If placed on a curve it will show the side twist of the rail under the locomotive's thrust. It can be laid upon an automobile wheel to detect how nearly bumps come to causing overstrain.

The finger works somewhat like a slide rule, being of two parts, which telescope. This telescoping amounts only to the diameter of a tremor or a vibration, that is, something like one ten-thousandth of an inch. Even so slight a motion slides a piece of iron to or from between two sensitized electrical instruments on the finger.

These instruments correspond to the sense of touch. They detect the motion of the bit of iron, and with it the distortion which causes the movement. They register this movement by slight electrical changes.

The "nerves" of the finger then come into play. They are plain wires, which carry the slight electrical disturbances to instruments that amplify them into movements an inch long, that can be calibrated in terms of wear and tear.

### Made Fortune From Linoleum

#### Ingenuity Of Englishman Started Him On Road To Wealth

Lord Ashton, whose amazing fortune was between thirty and forty millions, owed his wealth originally to his clever father's ingenuity, says the News of the World. The father was a working house painter who started a little shop in Lancaster, where he combined with his trade a picture-framing business. When cellophane was introduced from America he improved on it by giving it a backing of powdered cork instead of cloth. So linoleum was invented and his fortune made. Lord Ashton himself worked in his father's factory from an early age and proved a wonderful man of business.

### Grain Stocks Decrease

#### Grain In Store At End Of June Shows Decrease Of Over Three Million Bushels

Returns received as to stocks of grain in store for the week ended June 27, 1930, show a decrease of 3,277,506 bushels, according to a report issued by the Dominion Bureau of Statistics. Stocks for the week were as follows: Wheat, 13,735,712. Oats, 9,927,331. Barley, 22,639,184. Flax, 512,382, and Rye, 8,241,089, a total of 172,155,698 bushels. Decreases are noted in wheat of 2,281,693. Oats, 356,580. Barley, 3,771. Flax, 38,061, and Rye, 387,411 bushels. For the same week last year the amount in store was 148,620,622 bushels.

#### White Pine Best For Patterns

White pine is used for 90 per cent. of the patterns made in North America. The reasons for this, are, that white pine, more than any other wood, is easily worked, is of soft texture, is comparatively strong, is very durable and, most important of all, has very little shrinkage, which gives it the power to hold its shape indefinitely after being worked.

#### A Good Definition

Col. "Pat" Hurley, of Oklahoma is a lawyer, but his business interest is oil and real estate. His definition of oil operators is: "An oil operator is a man who doesn't know whether he is four feet from \$1,000,000 or 1,000,000 feet from \$4."

The trap door spider covers its tunnel with a trap door, neatly beveled to fit the opening, and hinged at one side. The door is made of alternate layers of silk and soil.

British airplanes now in regular use carry 22 passengers.

## SUNDAY SCHOOL LESSON

JULY 27

### DEBORAH "A LEADER IN A NATIONAL EMERGENCY"

Golden Text: "Say to them that are of a fearful heart, 'Be strong, fear not.'"—Isaiah 35:4.

Lesson: Judges 4:1-15.

Devotional Reading: Psalm 68:4-11.

#### Explanations and Comments

The Oppression At the Hands Of Jabin, verses 1-3.—When Ehud was dead, the Israelites were oppressed by the Philistines, and for fear of them travellers left the highways for the byways. With only his ox-goad as a weapon, probably at the head of many other peasants similarly armed, Shamgar killed six hundred Philistines. Then came a crisis. Jabin, king of the Northern Confederacy of the Canaanites, through Sisera, his commander-in-chief, had for twenty years held a military despotism over the northern districts of Canaan. The children of Israel cried unto Jehovah for help, for Jabin had nine hundred chariots, and they lived on the hills and had none.

Deborah Summons Barak To the Defense, ver. 4-7.—The name Deborah means "Bee," and Matthew Henry, that ancient interpreter of the Bible, sees in Deborah, the judge, the fulfilment of her name by her industry, sagacity, and great usefulness to the public, her sweetness to her friends and sharpness to her enemies. She was a prophetess and the wife of Lapidoth. To quote Matthew Henry again: "The termination not being commonly found in the name of a man, some make this name the name of a place: she was 'a woman of Lapidoth.' Others take it appellatively, Lapidoth, signifying 'lamps.' The rabbis say she had employed herself in making wicks for lamps of the tabernacle; and, having stooped to that mean office for God, she was afterwards thus preferred. Or she was a woman of illumination, one that was extraordinarily knowing and wise." Between Ramah and Bethel, in the hill-country of Ephraim, she was wont to sit under a palm-tree as judge, perhaps not so often to settle disputes between men as to declare what was the judgment of God in national affairs, and the tree was therefore called the palm-tree of Deborah.

Barak Requires Deborah's Aid, verses 8, 9.—Barak was not brave enough to start forth alone, and refused to go unless Deborah would go with him. Deborah consented, but added that he would not have the honor of the result, for Jehovah would sell Sisera into the hands of a woman. Sisera was killed by Jael, a woman (verses 17-22), but Deborah's words seem rather to apply to herself, that to her, rather than to Barak, would be given the credit for the victory.

An "intelligent" perfume filling apparatus has been devised, which refuses to drop any liquid into a bottle that happens to be imperfect.

A property in Durham, England, is held at the "rent" of three grains of pepper yearly.

### Consume More Meat

#### Substantial Increase In the Quality Of Meat Consumed By the Average Canadian

Reports of the Live Stock Branch of the Dominion Department of Agriculture, show a substantial increase in the quality of meat consumed by the average Canadian, particularly beef, lamb and mutton. In 1928, the home market absorbed 648,600,000 lbs., while in 1929 it absorbed 676,800,000 lbs., an increase of 28,000,000 lbs. of beef, or roughly 2 lbs. more per capita. The Canadian market consumed 70,500,000 lbs. of lamb and mutton in 1929, compared with 62,200,000 in 1928, an increase of 8,300,000 lbs., or nearly 1 lb. per capita.

### Outdoes King Of Birds

#### Flock Of Eagle Raiders Were Annihilated By Airplane

After longing for unnumbered centuries to fly with the wings of an eagle, man has at last even outdone the king of birds. A flock of eagles raiding the sheep ranches near El Paso, Texas, were annihilated by an airplane with a passenger carrying a shot gun. In eight hours the plane had accounted for nine birds which a rancher had been trying to shoot from the ground for a year.

Candy making is one of the least hazardous of the specialized industries, both from accident frequency and severity.

### THE SPIRIT OF SUCCESS

The effort to accomplish; it is success. We fail only when we acknowledge failure and lie down defeated and disheartened. But while we "carry on," never knowing we're beaten, still striving to accomplish something worth while doing, aiming to serve our fellows, and reap what we have sown, we do not fail.

Lots of men are beaten according to the onlookers, when they are really victors and winners. The "thin red line" that retreated from Mons, holding the Germans back doggedly, disputing with the Hun every foot of the way, strewing the road with their bodies, but delaying the enemy's "smash through," were beaten by all the rules of warfare, but it is counted unto them as victory.

Columbus was beaten, according to the scoffers of his day, before he started across the ocean; he was beaten when his crew mutinied and when adverse winds delayed his ships' progress, but he emerged triumphant. Men who built the C.P.R. were beaten many a time; they could hardly give the stock of the C.P.R. at \$25 a share; often they could not meet their due payments or in order to meet them, put their own private fortunes into the bag and borrowed right and left to pay their men and meet their obligations, but who dare say that Canada's great railway builders were beaten?

So we might continue. Illustrations of the truth we have stated are met on every side. We know a newsboy in a great Canadian city who in spite of a most serious physical handicap, has risen from the rank of a newsboy at a street corner until today he is the head of a big distribution business. He could not fail; he kept on plugging and won. So we say to you good folk who are always prophesying failure for the other fellow; put your hammers away and cheer instead of knocking. The fellow that you think is failing is only going through the experiences that every successful man has had to undergo. Success springs from the seed of failure. "Except it die," says the scripture of the seed, "It cannot live." In death it finds life. In failure we find success. In defeat we reach victory. The effort to accomplish is, of itself, success.

### ON GOING TO THE DOGS

My grand dad, viewing earth's worn  
cogs,  
Said things were going to the dogs;  
His grand dad in his house of logs,  
Said things were going to the dogs.  
His grand dad in the Flemish bogs  
Said things were going to the dogs;  
His grand dad in his old silk togs  
Said things were going to the dogs.  
There's no thing that I have to state,  
The dogs have had a good long wait!

The life of an imposter is a very  
short one, says an ex-convict  
and a man who has been after  
many.

A writer of success says that people  
should notice little things in life. For-  
sakers, of course, often pick up a piece  
of paper and make a note of it.

## Here and There

Pressure of business and growth  
of the Canadian Pacific Telegraphs  
has necessitated the appointment  
of an assistant general manager of  
the system. W. D. Neill, assistant  
manager, western lines, Winnipeg,  
having been promoted to the posi-  
tion. Other appointments result-  
ing from this are: W. M. Thomp-  
son, superintendent, Ontario Divi-  
sion, Toronto, to be assistant man-  
ager, western lines, Winnipeg; H.  
S. Ingram, superintendent, eastern  
division, Montreal, to be superin-  
tendent, Ontario division, Toronto;  
and W. S. Emery, chief operator,  
Montreal, to be superintendent,  
eastern division, Montreal.

Fox Film Corporation during  
early July took sound records of  
the wind in the pines, the music  
of the waterfalls and the rippling  
of streams around Banff Springs  
Hotel and into this boxed atmos-  
phere there will be placed actors  
and actresses who will be shown  
climbing mountains, walking by the  
side of lakes or canoeing on water-  
courses they have never seen.

Beating the world's record in  
passenger traffic operations, west-  
ern Canada came into the lime-  
light at the end of June with the  
1,252 mile continuous run from  
Fort William to Calgary performed  
by Canadian Pacific engine No.  
2808, of the H1 class. This loco-  
motive is one of several now in  
service and under construction for  
the railway and are the latest type  
of passenger engine.

Carrying nearly a hundred tour-  
ists organized by the University of  
Montreal, a special Canadian Pacific  
train left Montreal July 5 for  
western Canada and the Pacific  
Coast. This tour is the sixth an-  
nual transcontinental trip under-  
taken and will last for three weeks.  
The richest industrial, agricultural  
and commercial districts of Can-  
ada, as well as the most beautiful  
scenery, including the Rocky  
Mountains, will be visited.

With a five-pound trout taken  
himself and a four-pounder landed  
by his son, in the catch, Arthur C.  
Roche, of Melrose, Mass., has just  
concluded a ten-day fishing trip  
down the Cain's River, New Brun-  
swick. He said he had never heard  
of waters where there were so  
many trout as in Cain's River.

A total of over \$87,000,000 is to  
be spent this year on the construction  
and maintenance of roads through-  
out Canada. Ontario has set aside  
\$12,500,000 of which \$10,000,000 for  
new construction; Quebec will  
spend \$11,000,000 for extending, im-  
proving and maintaining the pro-  
vincial system of roads. Maritimes  
will expend \$10,000,000; the Prai-  
rie Provinces, \$15,000,000, and  
British Columbia, \$8,500,000, rep-  
resenting a total of \$67,000,000  
spent by provincial governments.

### ENGLISH WOMAN'S FEAT

Defeating ninety-nine crack shots  
of King George's naval, army and air  
forces throughout the British Empire,  
Miss Marjorie Foster, 33-year old mo-  
tor driver in the Great War, won the  
King's Prize, and with it the rifle-  
shooting championship of the British  
Empire, at Bisley last Saturday. It  
was the first time in the seventy years  
since the prize was first awarded that  
a woman had won the most coveted  
of the world's marksmanship trophies.  
She was competing on exactly the  
same terms as the men, and among  
the 100 who qualified for the final  
round she won on her coolness, her  
nerve and her pluck. Today she is a  
heroine of England in a niche along-

side Amy Johnson, who flew alone to  
Australia, and Winifred Brown, who  
won the King's cup air race a fort-  
night ago against the greatest pilots  
of the country.

### LLOYD GEORGE'S TROUBLE

Lloyd George's hope for early in-  
troduction of some measure of electo-  
ral reform during the life of the Mac-  
donald Government was shattered  
when the Government's committee,  
under the chairmanship of Lord Ullis-  
ter, decided it could find no basis  
for agreement and broke up after  
seven month's work.

The Liberals, with 5,300,947 votes  
polled at the last general election, hold  
only 59 seats in Parliament, against

the Conservative's 260 seats  
for 8,664,243 votes and Labor's 287  
seats with 8,862,594. Lloyd George  
hoped some time that the Laborites  
would support his demand for pro-  
portional representation, but the na-  
tional executive of the Labor Party  
refused to countenance any discussion  
of the subject.

A correspondent wants to know if  
an amateur can take good photo-  
graphs. The answer is in the negative.

Thieves forced open a safe in an  
Edinburgh store with a pair of scis-  
sors. Shear genius.

### CHAPTER XXI.—Continued

Long after she had read the letter a second time and put it safely away in prospect of a third perusal, parts of it kept coming back to her, such as: "You ask why I should be inarticulate with you, 'of all people.' I've sometimes wondered about that myself. Ask Grandma. Perhaps out of the wisdom of years she can explain that foolish self-consciousness on my part. . . . And lower down: "Of course I wasn't mad—not even hurt, just a little sore, maybe. . . . I knew that deep down inside you didn't think me a Shylock anyhow—you just didn't understand. . . . So it was the dear old doctor who gave me away? . . . And near the end: "How's your boarder? According to Lizzie Baker he's about to settle down with a lady of my acquaintance 'for better, for worse,' etc.; only in this case it would be a great deal better than he, or any other man deserves. If this happens to be idle gossip, Charmian, please pass the good word along. Yours always, Jim."

"Well," said John Carter, rousing

CABIN + TOURIST THIRD CABIN + THIRD CLASS

W. N. U. 1848

the girl from her reverie, "was it satisfactory?"

"You mean?" questioned Charmian as they started back.

"I refer to the letter I was good enough to bring you," he replied.

She laughed happily.

"More than satisfactory. It took a load off my contrite mind. You see, John, I said something mean and hateful to Jim Bennett before he went away. I didn't intend to be unjust; but I was, terribly. Now it's straightened out and . . ."

"God's in His heaven?" quoted the doctor as she hesitated.

"You're a marvelously understanding soul," she answered. "That's exactly the way I feel, only I didn't think to express myself through Browning."

He smiled, drew up under a lonely tree and stopped the car.

"Trouble?" asked Charmian, thinking of the engine.

"I hope not!" he replied. Then his face grew serious and he turned to her. "Charmian," he began, "now that you've digested that letter—got your mind cleared on the subject, in a way, I've something to tell you. Wait till this automobile passes, and . . ."

But the approaching automobile didn't pass. It stopped, and Ezra Bascomb's familiar face peered at them from behind the windshield.

"Hi, Doc!" he greeted. "One of Luella Moore's twins is taken down with appendicitis. Doctor Howe wants you should hurry right along to the deacon's. He's waitin' fer you there."

"Thanks," shouted John Carter as Ezra, who was evidently in haste, sped on. Then he turned again to the girl beside him, and added ruefully:

"Like tide and time, appendicitis waits for no man. It's our confidential conversation that must wait. Do you mind if I drop you at the church? I ought to hurry."

### CHAPTER XXII.

Where's the doctor?" questioned Grandma, who was surprised to see the girl arrive on foot.

Charmian explained, while the old lady uttered an ejaculation.

"Dear me! Appendicitis?—and the deacon and Luella have just had words! Lizzie Baker told me the whole story. Maybe this trouble will bring 'em together again, though it's like as not to drive 'em farther apart, seeing as theirs isn't what you'd call a love match. Well, dearie, you got your letter, didn't you? Did Jimmy tell you what his mother's up and done?"

Charmian laughed, tossed the old coat on a chair and kissed her grandmother.

"He told me everything. I was silly to get worked up, Grandma. Of course Jim wasn't angry. He wrote as soon as he got my letter. Here!"

Charmian drew the lengthy epistle from her pocket and tossed it into Grandma's lap. "There's nothing in it that you can't see. It's a darling letter."

"You read it out loud, dearie."

Grandma smiled noting with thankfulness that the girl looked her sunny self again. "There's no hurry about supper with the doctor off hunting an appendix. I told you all along that Jim wasn't the boy to bear a grudge. You sit with your feet over the register, Charmian, and get warmed up while you read to me."

Charmian was only too glad to obey, and her grandmother was an attentive audience.

"That sounds most as if Jim was talking, doesn't it?" she commented when the letter was finished. "Read again what he says about his mother. She and Sophie always did look as alike as two peas; but that's where the resemblance ends. George K. used to say that Sophie (who was born half an hour ahead of Sarah), took all the selfishness there was, and didn't leave any for her twin! George was always a little hard on Sarah because he felt she ruined James Bennett's life. What was it Jim said about them, dearie?"

Charmian found the place and read: "I feel as if I had two mothers all of a sudden. It's a weird sensation, coming into a room and not being sure whether you're confronting your mother or your aunt? Joking aside, the resemblance is really startling, till you get used to it. And how they love each other! Seeing them together has made me wish I had a twin—some one who'd understand me the way Mother and Aunt Sophie seem to understand each other. As for this ranch business—"

"He didn't say, did he," broke in

Grandma, "whether he's going to run the farm for 'em? Seems if those two women were pretty old to start any such a thing. Sarah Bennett married late in life. She can't be a day under fifty-six, nor Sophie either."

"Well, naturally," laughed Charmian, "considering that they're twins! No, Jim didn't mention that part of it."

"Nor say what they'd do with the Wickfield house," went on Grandma, exasperated at this oversight. "Men are terribly unsatisfactory about details. I remember a parish meeting thirty-odd years ago when there was an awful fight. I was sick with a cold and couldn't go; and will you believe it, when your grandfather came home all he said was, that 'there seemed to be a little unpleasantness!'

He never so much as mentioned how Edgar Purdie shook his fist in the face o' the parish clerk (it was Emmy Bascomb's father and as meek a little man as ever lived), and went off slamming the door behind him; or how Mrs. Garfield got so excited she had hysterics right in the vestry and had to be carried out. I never heard a word about it till next day when Lizzie Baker run over to borrow a yeast cake. I wonder, childy, if Jim is coming back to Wickfield."

"And leave his mother running a fruit ranch!" gasped Charmian. "If Jim ever does a thing like that, Grandma, I'll look for the end of the world. It's a wonder Mrs. Bennett let him go to San Francisco that week without her. Oh, dear! how can a woman with a nice son like Jim be such a tyrant?"

"I've been thinking that maybe Sophie will see how the land lies, and give Sarah a good talking to," replied Grandma. "Sarah'll take from her what she wouldn't take from anybody else, even James Bennett, and in her own way she loved him, too. Mrs. Merry was in a minute after Lizzie left, Charmian. She said to tell you they'd had a long letter from Madge, and that the baby'd got another tooth. It does seem strange to think of Madge having a baby, doesn't it? It makes you seem like a—well . . ."

"An old maid?" suggested Charmian, rising. "You may as well get used to the idea, Grandma. An old maid schoolma'am who—"

"Shucks!" interrupted Grandma with indignation. "I guess you don't need to be an old maid unless you want to! What are you going to tell Jimmy about that idle gossip he'd heard talk of?"

Charmian laughed, but she flushed also, and answered: "I think I'll forget that question, Grandma. It's none of his business."

"I guess he thinks 'tis," responded Grandma wisely; then with a sudden change of subject: "I wish you'd make milk toast for supper, dearie. Seems as if I'd sort of relish it tonight. And be sure you leave some cocoa on the stove in the double boiler. The doctor'll be home late, and most frozen, night like this. Look here, Charmian," she added as the girl turned toward the kitchen, "I didn't understand what Jim meant by saying he'd appoint you his deputy in the matter of Towser and Mouser."

"That was merely a bit of sentiment," smiled Charmian. "I'll explain about it later; but now I must hurry with our meal. You want a lamp, Grandma? It's almost dark."

"No, childy. I like to sit here this time o' day and see the lights come on in the kitchen windows, and watch folks hurrying home to sup-

per. Sometimes I can't make out who they are, but I always know they're glad the day's work is done and they're going home. Many's the time I've sat here in the twilight with your grandfather and watched the shadows of the evening steal across the sky," as the vesper hymn says. I'm never lonesome this time o' day as some folks are. I guess it makes me feel the way you felt one night when you were just a mite of a thing and I was putting you to bed. Your mother'd been in the habit of leaving a light turned low in the hall outside your door—sort of to keep you company; but that night she was at a church supper and after you said your prayers I sat down on your little bed and repeated the twenty-third psalm.

"I can see you now, looking up at me so soberly and listening to every word like a grown-up. Well, I kissed you, and gave the bedclothes a last tuck, and said: 'Good-night, childy, I'll leave the light, same as Mother does,' and what do you suppose you answered? You said, just as solemn as anything, 'No, Grandma. The Lord is my shepherd, I shall not want—a light.'"

"Oh, Grandma!" cried the girl, as she visioned the little Charmian of long ago. "You never told me that before."

"Didn't I? Well, I've thought of it enough times, goodness knows. It came into my head the minute you asked if I'd like a lamp. You see, dearie, I'm not afraid of the twilight even though it's a time of memories. . . . The Lord is my shepherd, I shall not want—a light."

(To Be Continued.)

**Dust Causes Asthma.** Even a little speck too small to see will lead to agonies which no words can describe. The walls of the breathing tubes contract and it seems as if the very life must pass. From this condition Dr. J. D. Kellogg's Asthma Remedy brings the user to perfect rest. It relieves the passages and normal breathing is firmly established again. Hundreds of testimonials received annually prove its effectiveness.

## Canadian Goods In British Daily Life

### Always Something To Remind People Of Dominion's Products

"What the future holds for Canadian products in the United Kingdom can be judged in the light of today," said Douglas S. Cole, B.Sc., Canadian Trade Commissioner, at Bristol, England, in an interview at Toronto. "The modern Englishman can rise in the morning from a Canadian-made bed on to a Canadian carpet, lather himself with a Canadian shaving brush and Canadian shaving cream, shave with a Canadian razor, come down to breakfast and eat Canadian cereals, Canadian bacon, Canadian eggs, and toast made from Canadian flour, all cooked on a Canadian gas or electric range, and kept wholesome in a Canadian refrigerator, the while he reads a newspaper printed on Canadian paper. He can drive in a Canadian car to an office equipped with Canadian furniture, dictate letters on Canadian paper, which he signs with a Canadian fountain pen. He reduces his weight by a Canadian massage roller, plays racquets in Canadian rubber shoes, tries to look graceful on Canadian skates, and drives his doctor to starvation with Canadian apples."

### Utilities Show Profit

The City of Regina utilities showed a new surplus, according to the statement of S. B. Nelles, city comptroller, of \$131,674 for the first five months of 1930, after deducting administration charges of \$7,083, while the Electric Light and Power Department showed a surplus revenue of \$139,507, the Water Department, a profit of \$11,391, and the Street Railway, a deficit of \$12,140.

Minard's Liniment removes Warts, relieves Bunions.

## WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as its termination often proves fatal.

Mrs. H. F. Stewart, Findlater, Sask., writes:—"Two years ago we were all very bad with attacks of dysentery. My husband got a bottle of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses we were completely relieved. Since then we have never been without a bottle of it in the house."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

## Little Helps For This Week

"Master, what shall I do to inherit eternal life?"—Luke x. 25.

I do not ask that Thou wilt bless With gifts of heavenly sort my day. So much as that my hands may dress The borders of my lowly way With constant deeds of good and right, Thereby reflecting heavenly light.

—Alice Cary.

Good deeds will shine as the stars in heaven.—Thomas Chalmers.

Good deeds are very fruitful; out of one good action of ours the Lord produces a thousand, the harvest whereof is perpetual.—Bishop Hall.

Miller's Worm Powders are a pleasant medicine for worm-infested children, and they will take it without objection. When directions are followed it will not injure the most delicate child, as there is nothing of an injurious nature in its composition. They will speedily rid a child of worms and restore the health of the little sufferers whose vitality has become impaired by the attacks of these internal pests.

## Signatures On the Roof

### Copper Plates On Stockholm Town Hall Bear Name Of Donor

Ragnar Ostberg, who has just been made a Royal Academician, is probably the most famous architect in Europe. His fame rests largely on the wonderful town hall which he designed for his native Stockholm, and which has been inspected by visitors from all over the world. It cost nearly a million pounds to build and it was decorated by a remarkable team of artists, which included a prince of the Royal House. The roof is composed of copper plates, each one of which is inscribed with the name of the citizen who paid for it, and the floor of one of the magnificent halls was made by the workmen, on their own initiative, out of odd pieces of marble left over from other building operations.

For all Skin Abrasions — Minard's Liniment.

A remarkable feature of the 1929 forest fire situation in Manitoba and Saskatchewan was that fires occurred and were fought in every month of the calendar year.

## CHILDREN CRY FOR IT—

CHILDREN hate to take medicine as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria has him soothed, asleep again in a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drugstore; the genuine always bears Chas. H. Fletcher's signature.

## READ OF A CASE LIKE HER OWN

### Decided to take Lydia E. Pinkham's Vegetable Compound

Moncton, New Brunswick—"Before my last baby was born I was very weak, nervous and discouraged. I saw an advertisement in the paper about a woman who had been like me so I bought a bottle of Lydia E. Pinkham's Vegetable Compound. I took three bottles and it carried me safely through that critical time. I have three children to care for and I feel well and strong. I have told two other women about your medicine."

Mrs. GUS ARSENAULT, 82 Albert Street, Moncton, New Brunswick.

"He didn't say, did he," broke in

**THE  
KID'S  
CLEVER**

He had nothing up his sleeve but a load of laughter. But he set the whole town talking with his crazy automoboat and his whizzing courtship.

**Snicklefritz ----**

Kissing is dangerous—tht result is sometimes a wedding.

A lady was entertaining the small son of her married friend. "Are you quite sure you can cut your meat, Willie?" she asked.

"Oh, yessum," he replied without looking up, "We often have it as tough as this at home."

Old Gentleman (to little boy playing in puddle)—Get out of that puddle at once you naughty boy.

Boy (Indignantly)—Go and find a puddle for yourself! I found this first!

He'd move heaven and earth to be a good golpher.

He's certainly moving some earth, said one of our ardent golfers.

Father says that when the society notes record that Mrs. Blank has "spent" the week end in Calgary, why don't they come right out and say she has spent Mr. Blank's weekly pay cheque as well.

Mother: Why didn't you kiss the maid when she left?

Small Daughter: I was afraid she would slap me like she did daddy.

"Do you act toward your wife as you did before you were married?"  
"Exactly. I remember just how I used to act when I first fell in love with her. I used to lean over the fence in front of her house and gaze at her shadow on the curtain, afraid to go in. And I act just the same now."

There was a young lady named Astor, Whose clothes fitter her like plaster When she happened to sneeze She felt a cold breeze And knew she had met with disaster.

It costs little to have the ears pierced. Any jazz band will do it for nothing.

**Here's Proof  
of the  
Tire Pudding**

THE reasons for the superior traction of Goodyear Tires can be demonstrated and proved. So can the superior vitality of the Goodyear carcass. Stretch Goodyear Supertwist Cord and ordinary tire cord on our cord-testing machine and see the far greater stretch of Supertwist Cord which offsets the effects of road-shocks. Press the palm of your hand down on the Goodyear All-Weather Tread and note the pinch of its grip.

**SAFETY--  
at ANY speed**

With the new Firestone Heavy Duty Gum-Dipped Balloon Tires you have a wide margin of safety at ANY speed. Built in advance of today's car requirements, they withstand rougher usage than any car on any road at any speed, can give them.

Firestone Heavy Duty Balloons are made of Gum-Dipped cord construction—the strongest and safest method known. They have a deeper safety tread, extra side-wall thickness and two extra plies of Gum-Dipped cords just beneath the tread to absorb road shocks. They are the strongest, safest, toughest tires that Firestone has ever built.

Make your car safer for travel. Equip it with a set of new Firestone Heavy Duty Balloons. See your nearest Firestone Dealer today.
